Professional Experience

Adroit Information Solutions Pvt Ltd/Fuerte Solutions Private Limited (Location - Hyderabad) **Nov 2024 – Present**
Software Developer

- Designed, developed, and enhanced core application modules to improve performance, reliability, and user experience.
- Delivered high-quality applications within deadlines through effective development, testing, and deployment practices.
- Collaborated with UI/UX, backend, and QA teams to ensure seamless integration of new features.
- Optimized existing codebase through refactoring, improving scalability and maintainability.
- Participated in Agile ceremonies (sprint planning, grooming, retrospectives) to support efficient team workflow.

GenySoft - Integration & ERP Experts (Location - Hyderabad) **Oct 2023 – July 2024 (10 months)**
Software Engineer

- Led the end-to-end development of two Android applications, handling feature architecture, development, testing, and release.
- Designed and implemented reusable, scalable components that improved application performance and stability.
- Worked with cross-functional teams to deliver high-quality, production-ready solutions aligned with client requirements.
- Integrated modern technologies and tools to enhance development speed and product quality.
- Performed code reviews, debugging, and performance tuning to ensure seamless app functionality.

Versatile Mobitech Pvt Ltd(Location - Hyderabad) **Nov 202 – Aug 2023(10 months)**
Android Developer

- Independently developed and managed 10+ Android applications across multiple business domains.
- Implemented UI/UX designs into functional, responsive screens while ensuring consistency across devices.
- Conducted extensive debugging, issue resolution, and performance optimization for smooth application performance.
- Collaborated with designers, backend developers, and QA engineers for end-to-end project execution.
- Adopted modern frameworks, libraries, and best practices to improve productivity and reduce development time.

Exceloid Soft Systems Pvt Ltd (Location - Hyderabad) **Oct 2019 - Oct 2022 (3 years 1 month)**
Software Engineer

- Developed and maintained multiple Android applications across diverse business domains, ensuring high performance and stability.
- Delivered projects within tight deadlines by efficiently managing development tasks and collaborating with cross-functional teams.
- Worked closely with the QA team to ensure high-quality, bug-free releases through thorough testing and issue resolution.
- Improved application performance and reliability through proactive debugging, refactoring, and optimization.
- Continuously evaluated and adopted modern tools, frameworks, and technologies to enhance development productivity and product quality.

Education

CHANDIGARH UNIVERSITY **2022 - 2 024**
Master of Computer Applications - MCA, Computer Science 79%

Kolhan University, West Singhbhum Jharkhand **2013 – 2017**
Bachelor of Computer Application - BCA, Computer Application 76%

SKILL

Languages :- Java, Kotlin, Dart, JavaScript, HTML, CSS, Node.js, SQL, XML
Frameworks & Architectures:-Android SDK, Jetpack, Flutter, React Native, MVC, MVP, MVVM, Clean Architecture

Tools & IDEs :- Android Studio, NDK, Gradle, Eclipse, Visual Studio, Notepad++, Git, GitHub, GitLab, Bitbucket, Firebase, MySQL, SQLite, Hive, Room Database, MongoDB, Figma, Jira, JUnit, Espresso, Mockito, CI/CD Pipelines, SVG

Libraries & Dependencies :- Material Components, Retrofit, RxJava, LiveData, Volley, Hilt, Dagger, MQTT,

Concepts & Skills:- Mobile App Development Lifecycle, Object-Oriented Programming (OOP), Unit Testing, Agile Methodology, XML Navigation, View Binding, Data Binding, Kotlin Coroutines, SOLID Principles, State Management, Secure Development (Encryption, Authentication, Key Management, Permission Handling, API Security, Data Security)

Multimedia Expertise :- Audio Playback & Recording, Video Streaming & Playback, Image Processing, URL/Link Content Handling, HDMI Video Wall Output (Flutter Windows)

Platform Expertise :- Android Mobile, Android Tablet, Android TV, Windows (Flutter Desktop)
Hardware & System Integrations :- GPS, Camera, Bluetooth, Printer, Google Maps, Real-time Messaging & IoT using MQTT
Payment Gateway Integrations: MPOS (Ezetap), Stripe, Razorpay

Profile Summery

- Over 6 years of experience in Android development using Java, Kotlin, and Flutter/Dart, with Flutter experience on both Android and Windows platforms.
- Experienced in handling multimedia applications, including audio, video, image, and link content.
- Worked on HDMI connect for video wall in Flutter Windows.
- Experienced in building multi-language applications with dynamic localization support.
- Strong understanding of security concepts, including encryption, authentication, key management, API security, communication & data security, and permission management.
- Experienced in integrating Web APIs, REST APIs, local databases, third-party APIs, and payment gateways such as MPOS (Ezetap), Stripe, and Razorpay.
- Expert in JSON, Google AdMob, Material Design, Tab Layouts, Fragments, Activities, Services, and Adapters.
- Proficient with common Android framework APIs such as GPS, Camera, Bluetooth, Maps, and Printer.
- Experienced in working within the Agile framework and managing tasks through JIRA workflows.
- Skilled in real-time messaging and IoT communication using MQTT protocol.
- Development experience spans Android Mobile, Android TV, Tablet, and Windows platforms.

Projects

PunchArcade : Windows-Based Punch Speed Tracking & Video Recording System
Technologies: Flutter, Dart, WebSocket Communication, Windows Camera Integration, Real-time Video Recording, Hive database.
Description:-

- Developed a Windows-based punch-machine application to measure punch performance using real-time WebSocket communication.
- Integrated live camera preview and automatic video recording for each punch session with instant replay.
- Implemented session lifecycle management (start, record, stop, store results) synchronized with punch score data.
- Built a real-time scoreboard interface displaying punch speed, score, and session results.
- Optimized low-latency recording, playback, and real-time updates for smooth Windows device performance.

CloudAdWord : Ads broadcasting app (Android + TV + Windows).
Technologies:- Android Studio, SDK, Window, Android TV, Flutter, dart ,Kotlin, Git, GitHub, FCM ,Api integration,
Descriptions :-

- Developed the CloudAdWord mobile app using Flutter & Native Kotlin with seamless API communication.
- Integrated campaign scheduling, and automated advertisement broadcasting.
- Implemented FCM push notifications, real-time updates, and a responsive UI for Android TV display.
- Published and maintained on Play Store with continuous updates.

Fuelflux user: An on-road fuel management and CNG station support app.

Technologies:- Android Studio, SDK, Window, Flutter, dart, Git, GitHub, FCM ,Firebase Realtime Database, Google Map.
Descriptions :-

- Built user app using Flutter with Firebase Realtime Database.
- Integrated Google Maps for navigation, CNG station listing, route suggestions, and live availability.
- Implemented push notifications, real-time station updates, and user-friendly booking flow.

Fuelflux Admin: Admin management app for the Fuelflux system.
Technologies :- Android Studio, SDK, Window, Flutter, dart, Git, GitHub, FCM ,Firebase Realtime Database, Google Map.
Descriptions :-

- Developed admin panel to manage stations, availability, pricing, and announcements.
- Integrated Firebase database with secure role-based access.
- Added dashboard analytics, push notifications, and real-time station monitoring.

LaxiTal : A multilingual voice translation and communication app.
Technologies: Android Studio, SDK, Window, Flutter, dart, Git, GitHub, third-party api, Firebase, SVG, Figma, Voice recode, pdf convert, state management, language transition.
Description:

- Built using Flutter with support for voice recording, speech-to-text, and real-time translation.
- Integrated third-party APIs, PDF generation, SVG support, and dynamic UI.
- Added multi-language UI support using state management (Provider/BLoC).
- Published on Play Store with over thousands of downloads.

Pipo Parking (Domine: Parking) :- Smart parking and ticketing solution.
Technologies: Android Studio, SDK, Window, MVVM, XML, Kotlin, Gradle, Git, Pdf Generate, GitHub, Retrofit, Firebase, Push Notification , Node js, Shared preferences, Third-party library, Rezer Pay, Local Notification, Jetpack
Description:

- Created a complete parking system with user booking, QR-based entry, and payment gateway integration.
- Implemented MVVM architecture, Retrofit APIs, real-time slot availability, and Node.js backend integration.
- Added Razorpay payment gateway and in-app notifications.

GenySoft TechTalk Sessions (Event) :- Event management and booking app.
Technologies: Android Studio, SDK, Window, MVVM, XML, Kotlin, Gradle, Git, Firebase database
Description:

- Developed an event app for session listing, registration, and reminders.
- Integrated Firebase database for managing events and attendees.
- Implemented notifications and a clean, lightweight UI.

4TP(Domine: Freelance Services) :- A service booking platform.
Technologies: Android Studio, SDK, Java, MVC, XML, Shared preference, Web API, Firebase, Volley, Retrofit. Gradle, Git, Bitbucket, Razo pay, Socket, Push Notification, Jetpack
Description:

- Developed using Java MVC with Firebase & Web APIs.
- Integrated Razorpay for payments, push notifications, and user role management.
- Used Retrofit & Volley for network communication and Bitbucket for version control.

Assured Sum (Domine: Banking) :- Financial planning and investment app.
Technologies : Android Studio, SDK, Java, MVC, XML, Shared preference, Rest API, Firebase, Retrofit. ADB (AndroidDebug Bridge), Gradle, Git, Bitbucket, Push Notification, Jetpack
Description:

- Built secure banking modules using Java MVC and REST API.
- Added OTP login, loan management, financial tracking, and dashboard features.
- Integrated Firebase, Retrofit, and Android Debug Bridge for debugging and optimization.

Snapeats Partner App (Domine: Restaurant Management) :- Restaurant partner management app.
Technologies: Android Studio, SDK, Java, MVP, XML, Shared preference, Rest API, Firebase, Retrofit. ADB ,Gradle, Git, Bitbucket, Strip Payment Getaway, Camera , Push Notification, Jetpack
Description:

- Developed onboarding, menu upload, order tracking, and payment handling features.

- Integrated Stripe payment gateway, camera module, and push notifications.
- Built with Java MVP and Firebase backend with real-time order system.

Almira User App (Domine: E-commerce) :- Online shopping application.
Technologies : Android Studio, SDK, Kotlin, MVVM, XML, Shared preference, Rest API, Firebase ,Retrofit, ADB, Camera , Gradle, Git, Bitbucket, Razorpay, Push Notification, Jetpack, Dagger.
Description:
- Built using Kotlin MVVM with REST APIs & Firebase integration.
- Integrated Razorpay payment, product listings, cart, and order tracking.
- Implemented Dagger for dependency injection and Jetpack components for reliability.

CW POS (Tablet and Mobile)(Domine: Retail) :- Retail Point of Sale solution.
Technologies : Android Studio, SDK, NDK, Linux, MVC, XML, SQLite, Firebase, Java, JSON, Graphql Service, Git,Gitlab, Bluetooth, Printer, weight scale machine, Push Notification, Crashlytics, Camera , Jetpack
Description:
- Developed a complete POS system with billing, barcode scanning, Bluetooth printers, and weight scale integration.
- Used SQLite for offline storage and GraphQL for fast data operations.
- Supported multi-device deployment with crash analytics and Firebase features.

FMCG (Tablet and Mobile) (Domine: Fast-Moving Consumer Goods Retail) ;- A distribution & retail management solution.
Technologies: Android Studio, SDK, NDK, Linux , MVC, XML, SQLite, Firebase, Java, JSON, Graphql Service, Git, Gitlab ,Eztep, Scanner, Bluetooth, Printer, weight scale machine ,Push Notification
Description:
- Developed fast-moving consumer goods (FMCG) retail app with inventory tracking.
- Integrated barcode scanning, Bluetooth printers, and payment systems.
- Added SQLite for offline sync and GraphQL for backend communication.

Warehouse App (Mobile)(Domine: Warehouse Management) :-A warehouse stock & inventory management system.
Technologies: Android Studio, SDK, NDK, Linux, MVC, XML, SQLite, Firebase, Java, JSON, Camera, Graphql, Service, Web Api,ADB ,Gradle, Git, Gitlab, Crashlytics, Camera ,
Description:
- Built barcode scanning, stock-in/out management, and product tracking features.
- Integrated GraphQL APIs, SQLite offline mode, and Firebase crash analytics.
- Implemented camera scanning, user management, and real-time sync.

CW Mobile Mystore(Domine: Retail) :- Retail store management application.
Technologies : Android Studio, SDK, Dart SDK, Flutter, Linux, MVC, XML, SQLite, Firebase, JSON, Graphql Service, Web Api, ADB, Gradle, Git, Gitlab, Crashlytics, Provider state management, Change Notifier.
Description:
- Built using Flutter with Provider state management.
- Integrated GraphQL APIs, SQLite, and Firebase for scalable operations.
- Added billing, catalog management, order handling, and inventory checks.

<u>Other Projects</u>
1. **Almira Vendor** — Vendor-side e-commerce management app.
2. **Snapeats** — Complete food ordering app for end users.
3. **Tradex** — Business trading platform with order management.
4. **Smart App** — Utility and household service booking app.
5. **FastCount** — Fast counting & calculation tool app.
6. **Text Image Recognizer** — OCR-based text recognition app.
7. **IT Tips** — IT interview preparation & learning app.
